**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

---

# **Introduction**

The Blood Donation System serves as a crucial and user-pleasant platform, streamlining the system of blood donation for individuals keen to make existence-saving contributions. Within this system, users come upon more than a few critical functions upon coming into the net software. They can rapidly register, access complete information approximately the donation method, find out ongoing promotions, and discover nearby donation facilities.

Upon registering, both neighborhood and worldwide users can create person debts, successfully managed through diligent system administrators. Additionally, the device incorporates monetary contributions, allowing customers, whether or not registered or no longer, to donate budget to guide the operational aspects of blood collection and distribution.

Registered users advantage the ability to schedule donation appointments, share their studies, and, whilst vital, cancel appointments, pending approval via directors. Admins efficaciously manage the device, oversee appointment cancellations, and facilitate refunds as wished. They also handle staff debts, preserve an energetic presence on social media, and update important data about donation facilities. Managers, with the considered necessary credentials, utilize the gadget to generate reviews, conduct evaluation, and effectively control funds.

In this orchestration, Guests and Registered Users are the primary actors, riding the system's middle features, while Managers and Administrators serve pivotal secondary roles. The machine's workflow is depicted through unique use case diagrams, elucidating its seamless operation in facilitating the noble act of blood donation.

# Use Case Diagram and Use Case Scenarios

## Assignment 1 Certify Sheet

IT1060 – Software Process Modeling

Semester 2 - 2023

**Assignment 1 Certify Sheet****IT1060 – Software Process Modeling****Semester 2 - 2023**

---

**IT22246578: Weerasinghe W. P. D. A. S****a) Individual Contribution:**

- Worked on the actor – **Visitor**
- Worked on generalizing the use cases for actor visitor
- Created use case scenarios for,
  - Make a Feedback
  - Learn about Blood Donation

**b) Challenges faced:**

- We had an IWT task to publish, so we needed to manipulate our time.
- I needed to trade use case diagrams two or 3 times after thinking about the other individual's thoughts.
- Difficult to pick out use case generalization.
- Short period to do this assignment because of the upcoming mid-examination.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	001	
<b>Name</b>	Learn about Blood Donation	
<b>Summary</b>	The visitor seeks information about blood donation.	
<b>Priority</b>	03	
<b>Pre-condition</b>	The visitor is required to visit the website.	
<b>Post-condition</b>	Get an idea about blood donation.	
<b>Primary actor</b>	Visitor	
<b>Trigger</b>	Visitor wants to know about blood donation.	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	Visitor see an advertisement from Facebook.
	2.	Visitor Click the URL in the advertisement.
	3.	Visitor visits to the website.
	4.	Visitor click donation page.
	5.	System shows the details about blood donation.
	6.	Visitor click the FAQ page to get more information.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	2a	Visitor click the URL but does not open the Website.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	002	
<b>Name</b>	Make a Feedback	
<b>Summary</b>	Visitor makes a Feedback	
<b>Priority</b>	3	
<b>Pre-conditions</b>	Visitor has logged in to the account	
<b>Post-conditions</b>	Visitor submit the feedback	
<b>Primary Actor</b>	Visitor	
<b>Trigger</b>	Visitor can express his/her own idea	
<b>Main Scenario</b>	Steps	Actions
	01	The visitor opens the website.
	02	The visitor enters their username and password to access their account.
	03	The visitor selects the "Feedback" option at the top of the webpage.
	04	The system shows a page where the visitor can provide feedback.
	05	The visitor writes his/her own feedback in the text box.
	06	The visitor submits their feedback by clicking the "Submit" button.
	07	The system sends an email confirming receipt of the feedback.
<b>Extension</b>	Steps	Branching Action
	2a	Visitor entered user name or password are invalid.
	6a	The visitor provided feedback but did not complete the submission.
	7a	Visitor did not receive an email confirming receipt of the feedback.

**Assignment 1 Certify Sheet****IT1060 – Software Process Modeling****Semester 2 - 2023**

---

**IT22131324 – Dinushani G G T B****a) Individual Contribution:**

- Worked on the actor – **First -Time doner**
- Worked on generalizing the use cases for First-Time doner
- related use case scenarios for,
  - Registration
  - Scheduling a Donation Appointment

**b) Challenges faced:**

- We held online meetings in addition to on-campus ones to discuss and complete assignments effectively.
- Efficient time management was essential to meet deadlines for assignments in other modules.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	003	
<b>Name</b>	Registration	
<b>Summary</b>	Create a new account	
<b>Priority</b>	2	
<b>Pre-condition</b>	Should visit to the website	
<b>Post-condition</b>	First time donor has a new account	
<b>Primary actor</b>	First Time Donor	
<b>Trigger</b>	First time donor wants to create a new account	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	The visitor opens the website.
	2.	first-time donor selects the "Registration" button.
	3.	The system shows a form for the donor to fill out.
	4.	The donor provides their name, username, email address, and password in the form.
	5.	The system sends an email with the pin number to confirm the E-mail and First-time donor enters the pin number for verification.
	6.	The donor submits the registration form by clicking the "Submit" button.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	4a	The system notifies First time donor that the entered email is not valid.
	4b	The system notifies first time donor that the entered username already exists.
	4c	The system notifies first time donor that the created password is weak.
	4d	The system notifies first time donor that the re-entered password is not match with previous password.
	6a	The system notifies that the user does not confirm the e-mail.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	004	
<b>Name</b>	Scheduling a Donation appointment	
<b>Summary</b>	First time donor Request a donation appointment	
<b>Priority</b>	3	
<b>Pre-condition</b>	First time donor login visits to the website	
<b>Post-condition</b>	Make appointment successfully	
<b>Primary actor</b>	First Time Donor	
<b>Trigger</b>	First time donor wants know about donation ability	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	The first-time donor enters their username and password to access the system.
	2.	The donor selects the "Registration" button.
	3.	The donor chooses the type of blood donation they want to make.
	4.	The donor picks an available appointment slot.
	5.	The donor submits their registration by clicking the "Submit" button.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	1a	The first-time donor entered an invalid username and password.
	5a	The Submission did not Complete successfully.

**Assignment 1 Certify Sheet****IT1060 – Software Process Modeling****Semester 2 - 2023**

---

**IT22254948: Sanjaya W. A. I****a) Individual Contribution**

- Worked on the actor – **Regular Doner**
- Worked on generalizing the use cases for Regular Doner
- Created use case scenarios for,
  - Change Password
  - View Blood Donation Centers

**b) Challenges faced**

- Had Assignments from other modules, requiring efficient time management to meet all deadlines.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	005	
<b>Name</b>	Change Password	
<b>Summary</b>	Regular donor wants to change Password	
<b>Priority</b>	1	
<b>Pre-condition</b>	Regular donor log in to the account	
<b>Post-condition</b>	Regular donor received a new password	
<b>Primary actor</b>	Regular donor	
<b>Trigger</b>	Regular donor needs to improve the account privacy	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	Regular donor goes to the website
	2.	Regular donor Click the login button
	3.	System displays the login page to regular donor.
	4.	Regular donor enters username and password
	5.	System verifies the regular donor as a valid user
	6.	Regular donor goes to his own profile
	7.	Click on the change password
	8.	Change the password and submit.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	4a	A regular donor provided an invalid username or a weak password during the login.
	8a	The password used by the regular donor was deemed weak during the login process.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	006	
<b>Name</b>	View blood donation centres	
<b>Summary</b>	Regular donor finds a Blood donation centre	
<b>Priority</b>	2	
<b>Pre-condition</b>	Regular donor must visit the website	
<b>Post-condition</b>	Regular donor confirmed a Blood Donation center	
<b>Primary actor</b>	Regular donor	
<b>Trigger</b>	Regular donor wants to know nearest center	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	Regular donor logs in to the system.
	2.	System displays the Dashboard.
	3.	Regular donor goes to the donation page and select the location section.
	4.	System shows the blood donation canters.
	5.	Regular donor picks the nearest canter where he can go easily.
	6.	System shows the direction where regular donor selection.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	1a	Regular Donar entered invalid User name or Password.

**Assignment 1 Certify Sheet****IT1060 – Software Process Modeling****Semester 2 - 2023**

---

**IT21377280: Jayalath J. R. D. S****a) Individual Contribution:**

- Worked on the actor – **Doctor**
- Worked on generalizing the use cases for an actor as a doctor
- Created use case scenarios for,
  - Respond to the Appointments
  - Access Report and Records

**b) Challenges Faced:**

- I encountered difficulty identifying the appropriate primary scenarios for specific use cases while writing them.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	007	
<b>Name</b>	Respond to the Appointments	
<b>Summary</b>	Doctor Response to the Appointments	
<b>Priority</b>	5	
<b>Pre-condition</b>	Doctor must visit the Website	
<b>Post-condition</b>	Send the confirmation mail	
<b>Primary actor</b>	Doctor	
<b>Trigger</b>	Doctor receives an appointment requests	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	Doctor goes to the website.
	2.	The doctor securely logs in by entering their username and password.
	3.	doctor reviews and approves appointment requests, considering factors like urgency and availability.
	4.	Doctor Approves Appoint Request.
	5.	System sends the user an appointment confirmation email.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	2a	Doctor entered invalid Username or Password.
	5a	Those Who have made an appointment did not receive confirmation mail.

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	008	
<b>Name</b>	Access reports and records	
<b>Summary</b>	Doctor access the reports and records	
<b>Priority</b>	4	
<b>Pre-condition</b>	Doctor must visit the Website	
<b>Post-condition</b>	Adding Recommendations	
<b>Primary actor</b>	Doctor	
<b>Trigger</b>	Doctor wants to access reports and records	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	Login to the Website.
	2.	The doctor enters their username and password for authentication.
	3.	After logging in, the doctor lands on the home page.
	4.	The doctor uses the search bar to access the "Search Records" option.
	5.	Within the "Search Records" section, the doctor views donor information.
	6.	The doctor navigates to donation reports for further insights.
	7.	While reviewing records, the doctor adds recommendations as necessary.
	8.	The doctor logs out of their account.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	2a	Doctor entered invalid Username or Password.

**Assignment 1 Certify Sheet****IT1060 – Software Process Modeling****Semester 2 - 2023**

---

**IT22113122: Bandara T. C. N****c) Individual Contribution:**

- Created the use case diagram for **Send Blood Request alerts**
- Worked on the actor – **Admin**
- Worked on creating use case scenario for **Admin sends Blood Request Alert**

**d) Challenges Faced:**

- there was a time management problem

**Assignment 1 Certify Sheet**

**IT1060 – Software Process Modeling**

**Semester 2 - 2023**

<b>Number</b>	009	
<b>Name</b>	Send Blood Request Alert	
<b>Summary</b>	Admin sends Blood Request Alert	
<b>Priority</b>	3	
<b>Pre-condition</b>	Admin log in to the admin account	
<b>Post-condition</b>	Regular donors have received notification message	
<b>Primary actor</b>	System Administrator	
<b>Trigger</b>	Admin wants to send a blood request message to registered donors	
<b>Main scenario</b>	<b>Step</b>	<b>Action</b>
	1.	Admin goes to the website.
	2.	Login using with admin credentials.
	3.	Admin checks the reports.
	4.	Admin will identify which blood groups are missing.
	5.	Admin check the donor's information.
	6.	Admin sends the blood donation request alert to the selected donors.
<b>Extensions</b>	<b>Step</b>	<b>Branching Action</b>
	2a	Admin entered username or password invalid.
	6a	Registered donors have not received the blood donation request alert
